Q1

2010

Things Are Picking Up!

We can all agree last year was a tough year for both small and large businesses, with many businesses having to face tough decisions. In view of this, we knew that we had to be very different with our approach and ensure we offered competitive rates and high quality of service, whilst keeping a strong focus on safety.

Looking back on 2009 D.M.E. Crane Hire managed to maintain and gain new loyal clients, grow our business, maintain zero lost time injuries and relocate to our new premises in Emu Plains.

We sincerely thank our loyal clients and employees and look forward to a successful 2010.

Des says...

“We don’t have any problems getting it up!”

With over 15 years experience in the industry, Des and the team are available 7 days per week to discuss your crane requirements and carry out free site inspections.

“My focus is to assist you in your lift plans and studies to ensure it’s done once with safety in mind. This will minimise your time and save you money.

The rates are great! I strongly believe we offer a service second to none!”

- 30 tonne Truck Crane Tadano
- 50 tonne Truck Crane Kato
- 50 tonne All Terrain Crane Demag
- 60 tonne All Terrain Crane Demag
- 80 tonne All Terrain Crane Demag

FEATURE LIFT

NYE 2009 Sydney Harbour Bridge effect

D.M.E. Crane Hire are proud to be part of what has become the best New Years Eve display on the planet!

We have now been part of the team for our 5th year, working closely with another member of the D.M.E. Group – D.M.E. Kermac.

Working in a small designated work area in lane 8 of the Sydney Harbour Bridge and having a small time slot, we again managed to meet the requirements of all concerned to achieve the lifts in the set time frame.

We offer our congratulations to the City of Sydney for putting on another great show that keeps Sydney on the map!

Safety, training, professionalism – no compromise

You only get one chance to do a job properly and potentially, there's a number of things that can go wrong on an industrial site. Power cabling, underground lines and suspended slabs all present possible pitfalls. Fortunately, industrial lifting technology has benefited substantially from advances in computerised operation.

D.M.E. operations are backed by daily safety checks, logged by operators and certified testing through 'Crane-Safe'; based on scheduled safety and maintenance. In this way, D.M.E. Crane Hire guarantees total compliance with industry standards.

In heavy industrial applications, there can never be a compromise on safety, training or professionalism. D.M.E. Crane Hire use the best people – our own people. We give our team the best training, we equip and outfit them to ensure they take pride and ownership on project delivery. Our confidence in our team is our clients' certainty of professional compliance and safety, right through to completion.

"D.M.E. is driven by safety, success and delivery of a quality product."

Paul Draper JP

General Manager – D.M.E. Crane Hire

Customer Feedback

"We have now worked with D.M.E. Cranes for approx 12 months using a wide range of their cranes. As Des says, they don't have any problem getting it up!

I am very happy with the level of service that D.M.E. Cranes offer, from the team out in the cranes right back to their accounts department. It's a new refreshing change. Well worth a try!"

Jason Fisher
